

# The Title of Your Paper

First Author\*<sup>1</sup> and Second Author<sup>2</sup>

<sup>1</sup>*Affiliation of the first author*

<sup>2</sup>*Affiliation of the second author*

**Abstract:** Please write here the short paper or abstract of the paper to be presented at the 19th European Young Statisticians Meeting. This abstract or short paper will appear in the book of proceedings and *shouldn't exceed six pages*. Send both the PDF and TeX file by email to *eysm2015@karlin.mff.cuni.cz* before April 15th, 2015.

For references, use the style of the examples below [1, 2]. The references should be in alphabetical order. Figures should be included in PDF, see Figure 1.

**Keywords:** Maximum 5 keywords separated by comma.

**AMS subject classifications:** enter here the code of the mathematics subject classification, e.g. 62G09.

## 1 Introduction

19th European Young Statisticians Meetings (EYSM) will take place in Prague from August 31st to September 4th, 2015.

**Definition 1.** EYSM is a series of conferences organized by and for young European statisticians, under the auspices of the European Regional Committee of the Bernoulli Society.

The idea of the meeting is to provide young researchers (less than thirty years of age or two to eight years of research experience) an introduction to the international scene within the broad subject area - from pure probability theory to applied statistics.

**Theorem 1.** *The European Young Statisticians Meetings are held every two years under the auspices of the European Regional Committee of the Bernoulli Society.*

*Proof.* More information is available in guidelines and more recent remarks for their organisation. □

It is up to the members of the International Organising Committee to ensure that, for their respective countries, an honest choice in the spirit of the above definition is made. All participants are chosen by invitation only in a uniformly distributed way (2 participants per European country). In all cases should preference be given to first time participants.

Figure 1: Figures should be included in PDF.

*Remark 1.* Every participant is expected to submit an abstract or a short paper for conference proceedings and to give a twenty minutes talk introducing his/her research field to a wide audience. There are no parallel sessions.

The specific features which characterize the EYSM, and make this series unique in a certain way, are described in guidelines laid down by Paul Embrechts in 1986. To ensure that these features were preserved, the “guidelines” included a series of recommendations about the organisation of an EYSM, the mechanism for selecting the participants, and so on.
